

HDI Predictor Project - Development Phase Report

Prepared for the SmartBridge internship submission.

Location of Source Code: The runnable codebase is stored at the repository root in `app.py`, `train_model.py`, `generate_dataset.py`, `templates/`, and `static/`.

Source Code Overview: `generate_dataset.py` creates the CSV dataset, `train_model.py` trains and saves the model artifacts, and `app.py` runs the web server.

Dataset Path: `data/hdi_dataset.csv`.
