

Communication

Date: 29 june 2026

Team ID: (xxxxxx)

Project Name: Human Development Index (HDI) Prediction Using Machine Learning

Maximum Marks: 1 Mark

Communication Plan

Effective communication played a vital role in the successful development of the **Human Development Index (HDI) Prediction Using Machine Learning** project. The team maintained regular communication to discuss project progress, assign tasks, resolve technical issues, review milestones, and prepare for the final demonstration. Communication was carried out using online meetings, WhatsApp, GitHub, Google Meet, and Microsoft Teams to ensure smooth collaboration throughout the project lifecycle.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup Meeting	Daily	WhatsApp Group / Google Meet	All Team Members	Discuss daily tasks, assign work, and monitor project progress.
2	Progress Update	Weekly	Microsoft Teams / Google Meet	Team Leader & Team Members	Review completed tasks, discuss upcoming milestones, and track progress.
3	Issue / Bug Discussion	As Needed	GitHub Issues / WhatsApp / VS Code Live Share	Developers & Team Members	Resolve coding errors, debugging issues, and integration problems.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
4	Stakeholder Review	Bi-Weekly	Google Meet	Team Leader, Mentor, Team Members	Present project progress, receive feedback, and discuss improvements.
5	Final Demo Rehearsal	Once	Google Meet / Microsoft Teams	Entire Team	Practice the project demonstration and presentation before final submission.
6	GitHub Code Review	Weekly	GitHub	Team Leader & Developers	Review source code, merge updates, and maintain version control.

Communication Challenges & Resolutions

S.No	Challenge Faced	Resolution / Action Taken
1	Difficulty coordinating meetings due to different schedules of team members.	Scheduled weekly online meetings and used WhatsApp to share updates and meeting notes.
2	Code integration conflicts while merging project modules on GitHub.	Used Git branches, reviewed pull requests, and coordinated merging through the Team Leader.
3	Technical issues during Flask application testing and machine learning model integration.	Conducted debugging sessions in Visual Studio Code, discussed issues through Google Meet, and verified the solution before deployment.
