

Project Demo Planning

Date: 15 March 2026
Team ID: (Enter Your Team ID)
Project Name: Human Development Index (HDI) Prediction Using Machine Learning
Maximum Marks: 1 Mark

Project Demo Planning

The **Human Development Index (HDI) Prediction Using Machine Learning** project demonstration is planned to showcase the complete workflow of the application, from entering development indicators to predicting the HDI category using a trained Machine Learning model. The demonstration highlights the system architecture, dataset preprocessing, model prediction, Flask web application, and final output. Each team member is responsible for presenting a specific part of the project to ensure a smooth and professional demonstration.

Demo Plan

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the HDI concept, explain the project objective, and discuss the need for predicting Human Development Index using Machine Learning.	2	G Naveen
2	Dataset & Model Overview	Explain the HDI dataset, preprocessing steps, feature selection, and Machine Learning algorithm used for prediction.	3	Chandana Busireddy
3	Data Visualization	Demonstrate charts, graphs, and exploratory data analysis (EDA) used to understand the dataset.	2	Gandham Joshna
4	Live Application Demonstration	Show the Flask web application developed in VS Code, enter	4	Nandineni Gowthami

S.No	Demo Section	Description	Duration (mins)	Responsible Member
		sample values, and perform HDI prediction.		
5	Prediction Result & Working	Explain the prediction output, model accuracy, and how the Machine Learning model processes user inputs.	2	Shaik Talha
6	Conclusion & Future Enhancements	Summarize the project, discuss future improvements, answer questions, and conclude the demonstration.	2	G Naveen (Team Lead)

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Introduce the project, explain HDI, objectives, and the problem solved by the application.
2	Solution Overview	Explain the system architecture, dataset, Machine Learning model, Flask framework, and project workflow.
3	Live Feature Demonstration	Run the application in Visual Studio Code, enter sample input values, and display the predicted HDI category.
4	Q&A Session	Answer mentor questions, discuss model accuracy, limitations, and future scope of the project.
